Indicators Overview — MDB Impact Measurement Frameworks

Frameworks covered: EBRD · IFC/AIMM · FAST-Infra · ADB · AIIB · IDB · IsDB · NDB · AfDB

> **How to read this document:** Each section describes one MDB's measurement framework — how it scores projects, what it measures, and which specific indicators it uses. A cross-framework comparison table at the end shows how the same themes (climate, jobs, gender, water, private capital) are measured differently across institutions.

1. EBRD — Assessment of Transition Qualities (ATQ) / TOMS

Full framework name: Transition Objectives Measurement System / Transition Impact Monitoring System (TOMS/TIMS) **Country-level scoring:** ATQ scores (1–10 scale, where 10 = best-practice frontier) **Project scoring:** Expected Transition Impact (ETI), 0–100 (derived from ATQ gap × project intensity)

How the scoring works

The EBRD measures how far each country has advanced toward a sustainable market economy across **six Transition Qualities**. Each quality is scored 1–10 by normalizing raw indicators to a frontier value (set at the 98th percentile or theoretical optimum). Project ETI scores are higher when a project targets a quality where the host country is furthest behind — i.e., the ATQ gap is largest.

The Six Transition Qualities and Their Indicators

1. Competitive — Are markets open and generating value?

Sub-dimension	Key Indicators (unit)
Market structures	Applied tariff rates (weighted avg %); SME index (1–10); competition law enforcement (1–10); new business entries (per 1,000 population); subsidies (% of GDP)
Value generation	Labour productivity (GDP PPP per worker); Economic Complexity Index; Logistics Performance Index (1–5); credit to private sector (% GDP); global value chain participation (%)

2. Well-Governed — Are institutions transparent and rule-based?

Sub-dimension	Key Indicators (unit)
National governance (75%)	Regulatory quality (−2.5 to +2.5); government effectiveness (−2.5 to +2.5); Corruption Perception Index (0–100); budget transparency (0–100); press freedom index (0–100); property rights protection (1–7); informality (%)
Corporate governance (25%)	Board structure & functioning (0–4); transparency & disclosure (0–5); shareholder rights (0–4); auditing standards quality (1–7)

3. Green — Is the economy decarbonizing and adapting?

Sub-dimension	Weight	Key Indicators (unit)
Mitigation — physical	37%	Renewable electricity share (%); industrial GVA per tCO2; MWh generated per tCO2 emitted; agriculture GVA per tGHG
Mitigation — structural	63%	Renewable energy support policy (0–1); carbon price (0–1); fossil fuel subsidies (% GDP); just transition plan (0–1); INDC ambition rating (0–1)
Adaptation — physical	45%	NDGAIN human habitat score; water stress index; projected cereal yield change (%); people affected by droughts/floods per 100,000
Adaptation — structural	55%	National adaptation plans (0–1); institutional governance quality; agricultural capacity score
Other environment	—	PM2.5 exposure (μg/m³); waste intensity (kg per US$ household expenditure); threatened species share (%)

4. Inclusive — Are economic benefits broadly shared?

Sub-dimension	Key Indicators (unit)
Human capital (33%)	Human Capital Index (0–1); labour force participation (%); gender participation gap (women/men ratio); youth NEET rate (%); ICT skills (% population ≥15)
Access to finance (33%)	Savings at institutions (% population ≥15); borrowing access (%); fixed broadband penetration (%); safe drinking water access (%); sanitation access (%)
Policies & norms (33%)	Social benefit spending (% GDP); non-discrimination index (0–1); Women's Business and the Law score (0–100); gender violence rate (% female population)

5. Resilient — Are the financial system and energy sector stable?

Sub-dimension	Weight	Key Indicators (unit)
Energy sector (30%)	Sector restructuring (0–0.67); private participation (0–0.67); tariff reform (0–0.67); cross-border electricity connectivity (0–0.67); regulator independence (0–0.67)	
Banking health (35%)	Capital adequacy ratio (%); non-performing loans (%); loan loss reserves (%); foreign currency loans (%); five-bank asset concentration (%)	
Alternative financing (25%)	Non-bank financial assets (% GDP); market capitalization (0–100%); IPO activity; bond market diversity (0–6.75); money market quality (0–1)	
Regulation & safety nets (10%)	Deposit insurance effectiveness (1–10); bank risk management quality (1–10); supervisor independence (1–10)	

6. Integrated — Is the country connected internally and to global markets?

Sub-dimension	Key Indicators (unit)
External integration	Total trade (% GDP, 5-year avg); FDI net inflows (% GDP); financial openness (Chinn-Ito index); bilateral investment agreements (#); FDI restrictiveness (0–1)
Internal transport	Road connectivity; logistics competence (1–5); tracking capability (1–5); shipment timeliness (1–5); product loss rate (%)
Energy & digital	Electricity supply quality (1–7); transmission losses (%); broadband subscriptions per 100; internet users (%); 4G coverage (%)

Sectoral Context (drivers of indicator selection)

Sector	Transition challenges informing ETI
Energy	High carbon intensity; renewable investment gap; grid modernization lag
Industry	Hard-to-abate emissions (steel, cement, chemicals); resource inefficiency
Agrifood	Climate exposure; food loss in logistics; biodiversity/food security tension
Transport	Lack of low-carbon urban transport; fleet emission intensity
Urban/Municipal	Climate resilience deficits; waste management; water stress
Financial system	Climate risk data scarcity; local bank capacity gaps; absence of national climate standards

Unique feature: Country ATQ gap is the multiplier — a project in a low-scoring country on a weak quality earns a higher ETI, incentivizing investment where transition impact is greatest.

---

2. IFC — AIMM (Anticipated Impact Measurement and Monitoring)

Framework: AIMM General Guidance Note + 20+ Sector Framework Briefs (SFBs) **Scoring formula:** `Total AIMM Score = (Project Outcome Score × Likelihood) + (Market Creation Score × Likelihood)` **Scale:** 0–100 → Excellent (86–100) / Good (51–85) / Satisfactory (31–50) / Low (0–30)

How the scoring works

Each project is scored on two dimensions:

1. **Project Outcomes** — direct benefits to people (access, quality, affordability, jobs, GHG)
2. **Market Creation** — systemic changes that outlast the project (market structure shifts, replication by others)

Both dimensions are scored for intensity (Below Average → Significantly Above Average, normalized per $1M invested) and then discounted by a likelihood factor (project risk).

Cross-Sector Project Outcome Indicators

Category	Indicators
Access	New customers reached (#); GWh of power delivered; loans disbursed (#); litres of water supplied
Quality	SAIFI/SAIDI power reliability; health outcomes improvement; curricula quality score
Affordability	Cost to end-user (US cents/kWh; interest rate spread; cost reduction %)
Direct employment	FTE workers created (#)
Indirect / induced jobs	Supply-chain and induced employment (modelled)
Value added	GDP contribution = wages + profits + taxes ($M)
GHG emissions	tCO2e avoided or reduced; carbon cost integrated into NPV
ESG sustainability	ESG standards adopted beyond compliance (qualitative)

Market Creation Indicators

Attribute	Key Indicators
Competitiveness	New market entrants (#); price convergence; innovation adoption by competitors
Resilience	Funding source diversification; regulatory framework improvement; climate adaptation capacity
Integration	Infrastructure connectivity; local supply chain development; private capital mobilized ($M)
Inclusiveness	Market-wide adoption of models targeting women, BoP, rural populations
Sustainability	Sector-wide shift toward green standards or sustainable resource management

Inclusion bonus: Projects targeting women, low-income, rural, or refugee populations receive an upward intensity rating adjustment.

Sector-Specific Indicators (Sector Framework Briefs)

Sector	Market Gap Indicators	Impact Benchmarks
Agribusiness	Smallholder market access (%); food security gap	Farmers in supply chain (#); yield (t/ha); food safety certification
Capital Markets	Capital market depth (% GDP)	Bond/equity issuance ($M); investor diversification
DARP	NPL ratio; distressed asset overhang	Assets restructured ($M); banking sector stabilization
Education	Enrollment/completion gap; learning deficit	Students reached (#); test score improvement; teachers trained
Health	Disease burden; access-to-care gap	Patients served (#); health outcome improvement
Housing	Housing deficit (#units); affordability ratio	Units financed (#); cost-to-income ratio reduction
Insurance & Pension	Insurance penetration gap (%); pension coverage	Policies written (#); beneficiaries covered (#)
Manufacturing	Productivity gap vs. frontier; resource intensity	Output growth (%); energy/water intensity reduction; jobs created
Mining	Governance/ESG gap; resource revenue management	Revenue transparency score; reclamation area (ha)
Oil & Gas	Flaring intensity; energy access gap	Flaring reduction (tCO2e); people with new energy access (#)
Ports	Throughput capacity gap; logistics costs	TEU throughput; dwell time reduction (days)
Power	Electrification gap; renewable share	Connections (#); GWh generated; tCO2e avoided
Private Equity Funds	PE market development gap	Portfolio company growth (%); capital mobilized ($M)
Retail	Formalization gap; consumer access	Outlets in underserved areas (#); jobs created
Roads	Road density gap; rural access index	Km built/rehabilitated; travel time reduction (%)
SME Finance	SME credit gap ($Bn)	Loans to SMEs (#/$M); active borrowers (gender-disaggregated)
TMT	Broadband penetration gap; digital skills deficit	Internet subscribers (#); broadband coverage (%)
Tourism	Infrastructure gap; employment in hospitality	Visitor arrivals (#); local content spending ($M)
Transportation	Logistics performance gap; multimodal connectivity	Freight volume (t/year); GHG per ton-km
Venture Capital	VC ecosystem gap	VC deals (#/$M); portfolio company survival rate
Water & Wastewater	Safe water access gap (%); treatment rate	People with new access (#); non-revenue water reduction (%)
Advisory Services	Institutional capacity gap	Policy reforms adopted (#); persons trained

3. FAST-Infra — Sustainable Infrastructure Label

Framework: FAST-Infra Sustainable Infrastructure® Label **Structure:** 4 Dimensions · 14 Criteria · ~220 indicators (unique alphanumeric IDs) **Label types:** Self-Assessed (ops: valid 24 months, refresh every 12 months) | Verified (valid 36 months, annual surveillance audit)

How the scoring works

FAST-Infra uses a universal indicator set for all infrastructure sectors. Each indicator has a permanent alphanumeric ID. Two indicator types drive label eligibility: **Baseline Requirements** (all 14 criteria must be met) and **Positive Contributions** (at least one criterion must show a measurable contribution beyond baseline). Time-series indicators use `.A` (historical) and `.B` (forecast) suffixes, enabling longitudinal tracking. Projects additionally must satisfy **Minimum Safeguards** before any criterion is scored.

Minimum Safeguards (pre-requisite for all criteria)

Indicator ID	What it requires
MS.YP8	Environmental and Social Impact Assessment (ESIA) by qualified independent firm
MS.1PV	Climate Risk & Resilience Assessment aligned with TCFD

Indicator ID	What it requires
MS.5BA	Sustainability and Mitigation Action Plan
MS.H4C	Stakeholder Engagement Plan
MS.TT5	Environmental and Social Management System (ESMS), reviewed externally
MS.W4A	IFC Performance Standards or Equator Principles alignment assessment
MS.MW7	Environmental and Social Action Plan (ESAP, optional but disclosed)
MS.X4Y	Risk assessment on Associated Facilities (if applicable)

Environmental Dimension

E1 — Biodiversity and Ecosystem Services

Baseline: Comply with national biodiversity strategies; avoid/mitigate impacts on critical habitats and ecological corridors; demonstrate no net loss (non-critical habitats) or net gains (critical habitats); conduct biodiversity and ecosystem service risk assessment; assess cumulative landscape-scale impacts; establish long-term monitoring and adaptive management scheme.

Indicator ID	What it measures	Unit
E1.FG3	Compliance with national/subnational biodiversity strategies	Yes/No/Committed
E1.1YN	Avoidance of impacts on critical habitats and ecological corridors	Yes/No/Committed
E1.8BR	Net gains (critical habitats) or no net loss (non-critical habitats) demonstrated	Yes/No/Committed
E1.UM1	Biodiversity and ecosystem service risk assessment conducted	Yes/No/Committed
E1.QW4	Cumulative impacts assessed at landscape/seascape level	Yes/No/Committed
E1.I5G	Long-term biodiversity monitoring scheme in place	Yes/No/Committed
E1.IO1	Nature-Based Solutions incorporated (IUCN definition)	Yes/No

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
E1.4OO.3.A / .B	Expenditure on biodiversity measures (prior year / forecasted)	USD / USD per year
E1.UO5	Increase in area of natural habitats	hectares
E1.8OA	Decrease of degraded habitats	hectares

E2 — Climate Change Mitigation

Baseline: Comply with national/sub-national climate targets; monitor scope 1, 2, and 3 GHG emissions with a governance structure; set GHG reduction targets (Net Zero preferred); disclose construction and operational emissions; implement mitigation measures; include climate requirements in tendering; plan for decommissioning emissions.

Indicator ID	What it measures	Unit
E2.D9U	Compliance with national/sub-national climate targets and policies	Yes/No
E2.G2K	Scope 1, 2, 3 emissions monitored with mitigation measures	Yes — scope 1+2 / Yes — 1+2+3
E2.G2K.1	Scope 1 absolute emissions, prior calendar year	tCO2e
E2.G2K.2	Scope 2 absolute emissions, prior calendar year	tCO2e
E2.G2K.3	Scope 3 absolute emissions, prior calendar year	tCO2e
E2.O9E	Carbon management governance structure in place	Yes/No/Committed
E2.2SK	GHG reduction targets set (incl. Net Zero)	Yes/No/Committed
E2.TR9	GHG mitigation measures implemented	Yes/No
E2.ZT8	Climate mitigation requirements included in tendering	Yes/No
E2.C4U	Decommissioning plan includes emissions minimisation	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
E2.Q8W.A / .B	Avoided GHG emissions (prior year / forecasted)	tCO2e / tCO2e per year

---

E3 — Circular Economy and Resource Efficiency

Baseline: Comply with circular economy and waste policies; conduct Life Cycle Assessment on material footprint; source from environmentally responsible suppliers; limit critical raw materials and maximise recycled content; develop waste management plan; implement strategies to reduce freshwater consumption; assess water availability; design for disassembly and include decommissioning costs.

Indicator ID	What it measures	Unit
E3.8TF	Compliance with circular economy/waste/resource-efficiency policies	Yes/No
E3.9NH	Life Cycle Assessment on material footprint conducted	Yes/No/Committed
E3.TY9	Critical raw materials limited; recycled content maximised	Yes/No/Committed
E3.8IE	Waste management plan developed	Yes/No/Committed
E3.A4I	Strategies to reduce freshwater consumption	Yes/No/Committed
E3.BO2	Water availability in project area assessed	Yes/No/Committed
E3.6XO.1	Decommissioning costs included in financial model	Yes/No

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
E3.QK5.A / .B	Water usage at project level (prior year / forecasted)	m^3/year
E3.6TP.3.A / .B	Expenditure on circular economy measures	USD / USD per year
E3.8VX	Tons of waste diverted from landfill	t
E3.9IP	Reduction in water withdrawal	m^3/year

E4 — Pollution Prevention and Control

Baseline: Comply with pollution prevention and control policies; implement pollution management system; manage hazardous waste; meet wastewater discharge norms; keep air emissions within national norms/WHO guidelines; prevent soil contamination; minimise noise, light, radiation and vibration; undertake Cumulative Impact Assessment.

Indicator ID	What it measures	Unit
E4.KV9	Compliance with pollution prevention and control policies	Yes/No
E4.8KU	Pollution management system implemented	Yes/No/Committed
E4.QN9	Hazardous waste generated and managed	Yes/No
E4.V9T	Wastewater discharge norms met	Yes/No/Committed
E4.HB5	Air emissions within national norms / WHO guidelines	Yes/No/Committed
E4.6BK	Disturbance (noise, vibration, light, radiation) minimised	Yes/No/Committed
E4.9LA	Cumulative Impact Assessment undertaken	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
E4.2MB.3.A / .B	Spending on pollution prevention (prior year / forecasted)	USD / USD per year
E4.BR3.A / .B	Solid waste safely managed	t/year
E4.S2H.A / .B	Gaseous pollution safely managed	m^3 / m^3 per year
E4.7BL.A / .B	Wastewater safely managed	m^3 / m^3 per year
E4.T9A	Total people impacted by pollution prevention contribution	#

Adaptation & Resilience Dimension

R5 — Resilience and Climate Adaptation

Baseline: Comply with disaster risk reduction and climate resilience policies; identify interdependent systems; conduct Physical Climate Risk Assessment (including stress testing across climate scenarios); conduct Climate Transition Risk Assessment; assess human-made risks; set risk mitigation targets; establish governance framework for risk; implement adaptation measures.

Indicator ID	What it measures	Unit
R5.Z5G	Compliance with disaster/climate resilience policies	Yes/No
R5.1JT	Physical Climate Risk Assessment conducted	Yes/No/Committed
R5.1JT.1	Climate scenarios considered (incl. 1.5°C, 2°C, 4°C)	Multi-select

Indicator ID	What it measures	Unit
R5.R8S	Climate Transition Risk Assessment conducted	Yes/No/Committed
R5.R8S.1	Transition scenarios considered	Multi-select
R5.1KI	Human-made risk assessment conducted	Yes/No/Committed
R5.TZ1	Risk mitigation targets and programmes set	Yes/No/Committed
R5.8GV	Structured governance framework for risk management	Yes/No/Committed
R5.UP6	Adaptation measures implemented	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
R5.B6D.3.A / .B	Expenditure on resilience measures (prior year / forecasted)	USD / USD per year
R5.U2X.A / .B	People positively impacted by resilience measures	people / people per year

Social Dimension

S6 — Inclusivity and Gender

Baseline: Comply with gender equality and inclusion regulations; conduct GBVH risk assessment; develop and implement Gender Action Plan with KPIs; use sex-disaggregated data; ensure board representation; apply equal employment opportunity and wage parity; require contractors to do the same; provide separate facilities and zero-tolerance harassment policy; train staff on harassment management.

Indicator ID	What it measures	Unit
S6.9LA	Compliance with gender/inclusion regulations	Yes/No
S6.LV7	GBVH risk assessment and action plan in place	Yes/No/Committed
S6.Z5Q	Gender Action Plan developed and implemented	Yes/No/Committed
S6.4PQ	Gender Action Plan includes measurable targets/KPIs	Yes/No
S6.LS4.1	Female representation on governing board	%
S6.X1I	Wage parity policy for equivalent roles	Yes/No/Committed
S6.Y7A	Zero-tolerance sexual harassment policy	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
S6.3WY.A / .B	Female workers as % of permanent direct workforce	%
S6.Q5F.3.A / .B	Expenditure on inclusivity/gender measures	USD / USD per year
S6.HB5	Number of vulnerable people benefitting	#
S6.KV9	Number of women benefitting	#

S7 — Health and Safety

Baseline: Maintain OHS policy and plan; designate responsible OHS officer; conduct periodic OHS training; provide first aid and PPE; comply with OHS national laws and GIIP; monitor and track occupational accident rates; conduct Health Impact Assessment; maintain Community Health and Safety management plan; manage labour influx risks.

Indicator ID	What it measures	Unit
S7.YD5	OHS policy and plan for workers in place	Yes/No/Committed
S7.T8D	Designated OHS responsible person	Yes/No
S7.QO5	Compliance with OHS national laws and GIIP	Yes/No/Committed
S7.Z9O	Occupational accidents and injuries monitored	Yes/No
S7.Z9O.3	Non-fatal occupational accident rate	per 100,000 FTEs
S7.8BR	Health Impact Assessment conducted	Yes/No/Committed
S7.UM1	Community Health and Safety management plan	Yes/No/Committed
S7.3SB	Labour Influx Management Plan in place	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
S7.P8B.3.A / .B	Expenditure on health & safety measures	USD / USD per year
S7.X4B	Number of people with improved health and safety	#

S8 — Human Rights and Labour Rights

Baseline: Align with ILO conventions; protect all direct workers' rights; prohibit forced and child labour; guarantee freedom of association and collective bargaining; enforce equal opportunity and non-discrimination; require no child-labour clauses in all contracts; conduct human rights due diligence; provide grievance mechanism; promote local employment.

Indicator ID	What it measures	Unit
S8.FD1	Workers' rights aligned with ILO conventions	Yes/No/Committed
S8.FA6	Forced labour and child labour prohibited	Yes/No/Committed
S8.A7L	Freedom of association and collective bargaining guaranteed	Yes/No/Committed
S8.U3O	Equal opportunity and non-discrimination policy	Yes/No/Committed
S8.YL6	No child-labour clause in all contracts	Yes/No/Committed
S8.9BT	Human rights due diligence assessment conducted	Yes/No/Committed
S8.9MP	Grievance mechanism accessible to all workers	Yes/No/Committed
S8.W7L	Remuneration policy meets at least minimum wage	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
S8.7ZH.3.A / .B	Expenditure on human/labour rights measures	USD / USD per year
S8.I8Q	Number of people with secure employment created	#
S8.GC2	Percentage of local workforce	%

S9 — Land Acquisition and Resettlement

Baseline: Identify project-related displacement; implement Resettlement Action Plan (RAP) or Livelihood Restoration Plan (LRP); conduct census to identify eligible persons; compensate at full replacement cost; disclose information and consult affected communities; meet separately with vulnerable groups; design project to minimise displacement; address climate impacts in resettlement planning.

Indicator ID	What it measures	Unit
S9.O7H	Project-related land displacement identified	Yes/No
S9.9LQ	RAP / LRP in place	Yes/No/Committed
S9.OE1	Eligible persons identified via census	Yes/No/Committed
S9.OE1.1	Compensation provided at full replacement cost	Yes/No/Committed
S9.OE1.3	Vulnerable groups met with separately	Yes/No/Committed
S9.2QR	Project design minimises displacement	Yes/No/Committed
S9.8JJ	Resettlement plan addresses climate impacts	Yes/No/Committed

Positive Contribution (time-series):

Indicator ID	What it measures	Unit
S9.B1G.3.A / .B	Expenditure on land/resettlement measures	USD / USD per year
S9.QN8	Number of affected people benefitting	#

S10 — Stakeholder Engagement *(Baseline only — no Positive Contribution)*

Baseline: Conduct stakeholder mapping; develop and update Stakeholder Engagement Plan annually; effectively engage throughout lifecycle; include engagement in budget; identify affected communities; provide accessible information to vulnerable groups; consult indigenous peoples; obtain FPIC where required; maintain grievance mechanism; protect cultural heritage.

Indicator ID	What it measures	Unit
S10.HW8	Stakeholder mapping undertaken	Yes/No/Committed
S10.K2M	Stakeholder Engagement Plan considers all needs	Yes/No/Committed
S10.8CC	Engagement plan revised annually	Yes/No/Committed

Indicator ID	What it measures	Unit
S10.A7P	Number of directly affected people	#
S10.KW5.1	Indigenous peoples consulted	Yes/No
S10.OF4.2	Free, Prior and Informed Consent (FPIC) obtained	Yes/No
S10.5SI.1	Grievances received (count)	#
S10.5SI.2	Grievances addressed/resolved (count)	#
S10.SO5.A / .B	Budget for stakeholder engagement — development/construction	USD
S10.W5V.A / .B	Expenditure on stakeholder engagement — operations	USD / USD per year

Governance Dimension

> All governance criteria (G11–G14) are **Baseline Requirements only** — no Positive Contribution section.

G11 — Anti-Corruption

Baseline: Maintain comprehensive anti-corruption management system with annual reviews; communicate code of conduct; provide annual training; designate a responsible person; disclose anti-corruption principles publicly; conduct corruption risk assessment; maintain internal whistleblowing system; track confirmed incidents.

Indicator ID	What it measures	Unit
G11.PT2	Comprehensive anti-corruption management system in place	Yes/No/Committed
G11.N1K	Annual reviews of anti-corruption system	Yes/No/Committed
G11.9SA	Annual training on code of conduct	Yes/No/Committed
G11.9SA.1	Percentage of staff trained on code of conduct	%
G11.4UO	Corruption risk assessment conducted	Yes/No/Committed
G11.PV5	Internal whistleblowing system in place	Yes/No/Committed
G11.4UQ	Confirmed corruption incidents (count)	#

G12 — Transparency and Accountability

Baseline: Promote ethics and accountability; disclose environmental and social targets/risks publicly; require sustainability criteria in tendering; disclose ultimate beneficial owners; report nature-related impacts (TNFD-aligned); provide workers access to documentation; demonstrate transparent project award process.

Indicator ID	What it measures	Unit
G12.PQ5	Compliance with applicable transparency laws	Yes/No
G12.YL6.1	Tendering conducted according to best practices	Yes/No/Committed
G12.YL6.2	Sustainability criteria included in tender	Yes/No/Committed
G12.W7L	Ultimate beneficial owners disclosed	Yes/No/Committed
G12.2VU	Environmental and social targets/risks disclosed publicly	Yes/No/Committed
G12.2AG	Nature-related impacts disclosed (TNFD-aligned)	Yes/No/Committed
G12.2AG.1	TNFD disclosure pillars covered	Multi-select

G13 — Financial Integrity and Fiscal Transparency

Baseline: Report required financial information; maintain a tax strategy coherent with operations and approved by governance; document any tax exemptions; avoid non-cooperative tax jurisdictions; demonstrate audited financial statements; assess and disclose impact of government payment obligations on sovereign debt.

Indicator ID	What it measures	Unit
G13.Q7P	Required financial information reported	Yes/No
G13.5UW	Tax strategy coherent with business operations	Yes/No/Committed
G13.GS2	Tax strategy approved by governance body	Yes/No/Committed
G13.5PI	Located in non-cooperative tax jurisdiction (flag)	Yes/No
G13.RL7	Audited financial statements demonstrated	Yes/No/Committed
G13.BH8.1	Financial model shared with government	Yes/No/Committed
G13.BH8.2	Impact on sovereign debt reported	Yes/No/Committed

G14 — Sustainable Reporting and Compliance

Baseline: Track sustainability performance with time-bound milestones; include environmental and social actions in project budget; report actual and forecasted expenditure on E&S actions throughout lifecycle.

Indicator ID	What it measures	Unit
G14.4ZI	Sustainability tracked with time-bound milestones	Yes/No/Committed
G14.IL3	Environmental and social actions included in project budget	Yes/No/Committed
G14.N4B.A / .B	Budget for E&S actions — development/construction (actual / forecasted)	USD
G14.2AG.A / .B	Expenditure on E&S actions — operations (prior year / forecasted)	USD / USD per year

Full Time-Series Indicator Summary (19 pairs)

Indicator Pair	Description	Unit	Criterion
E1.4OO.3.A/.B	Biodiversity measures expenditure	USD	E1
E2.Q8W.A/.B	Avoided GHG emissions	tCO2e	E2
E3.QK5.A/.B	Water usage at project level	m^3/year	E3
E3.6TP.3.A/.B	Circular economy measures expenditure	USD	E3
E4.2MB.3.A/.B	Pollution prevention expenditure	USD	E4
E4.BR3.A/.B	Solid waste safely managed	t/year	E4
E4.S2H.A/.B	Gaseous pollution safely managed	m^3	E4
E4.7BL.A/.B	Wastewater safely managed	m^3	E4
R5.B6D.3.A/.B	Resilience measures expenditure	USD	R5
R5.U2X.A/.B	People positively impacted by resilience	people/year	R5
S6.3WY.A/.B	Female workers (permanent, direct)	%	S6
S6.Q5F.3.A/.B	Inclusivity/gender measures expenditure	USD	S6
S7.P8B.3.A/.B	Health & safety measures expenditure	USD	S7
S8.7ZH.3.A/.B	Human/labour rights measures expenditure	USD	S8
S9.B1G.3.A/.B	Land/resettlement measures expenditure	USD	S9
S10.SO5.A/.B	Stakeholder engagement budget (dev/const)	USD	S10
S10.W5V.A/.B	Stakeholder engagement expenditure (ops)	USD/year	S10
G14.N4B.A/.B	E&S actions budget (dev/const)	USD	G14
G14.2AG.A/.B	E&S actions expenditure (ops)	USD/year	G14

Unique feature: Every indicator has a permanent alphanumeric ID enabling consistent tracking across projects, geographies, and time — unlike most MDB frameworks where indicator definitions vary by project. Nature-Based Solutions (NbS) can be claimed as a qualifying element within the Positive Contribution of any non-governance criterion.

Source documents: *ST01 — Dimensions, Criteria and Indicators, v1.0* (Nov 2024; effective Jan 2025); *ST02 — Methodology, v1.0* (Nov 2024); *RQ01 — Verification and Labelling Requirements, v0.2* (2025). Full indicator reference: `fastinfra_framework_complete/FAST-Infra_Indicator_Overview.md`.

4. ADB — Design and Monitoring Framework (DMF)

Framework: DMF aligned with Strategy 2030 **Logic chain:** Inputs → Activities → Outputs → Outcomes → Impact **Ex-post rating:** 4-point scale using OECD-DAC criteria (Relevance, Effectiveness, Efficiency, Impact, Sustainability)

How the scoring works

The DMF is a results chain: each project defines outputs (physical and institutional deliverables) and outcomes (benefits to target groups). Ex-post evaluation uses the OECD-DAC criteria rated on a 4-point scale. Strategy 2030 adds corporate-level cross-cutting indicators across all projects.

Outcome Indicators (what changes for beneficiaries)

Sector	Key Outcome Indicators
Transport	Travel cost reduction (%); traffic volume increase; road safety rating improvement
Energy	Households with new electricity connections (#); renewable capacity added (MW)
Water / Urban	Residents with improved water supply (#); flood damage reduction ($M)
Gender	% of projects with "Effective Gender Mainstreaming" rating; female employment growth

Output Indicators (what is physically delivered)

Sector	Key Output Indicators
Physical assets	Km of all-weather roads built; solar mini-grids installed (#)
Institutional	Staff trained (#); policies approved by regulatory bodies (#)
Health / Education	New schools/clinics built (#); teachers/health workers trained (#)

Strategy 2030 Corporate-Level Indicators

Priority	Indicator
Climate finance	Adaptation and mitigation finance per project ($M)
Private capital mobilization	Volume of private finance co-leveraged ($M)
Sustainability	Project durability score beyond the financing period

Source documents: *DEFR Results Framework — Indicator Definitions* (Mar 2025); *DEFR Tracking Indicator Definitions* (Mar 2025).

---

5. AIIB — Results Monitoring Framework (RMF)

Framework: Results Architecture — two-level (Project + Corporate) **Project rating:** 4-point scale: Highly Satisfactory / Satisfactory / Moderately Unsatisfactory / Highly Unsatisfactory **Evaluation criteria:** 6 OECD-DAC criteria + AIIB Work Quality (7th criterion) **Climate target:** ≥50% of financing as climate finance by 2025

How the scoring works

At the **project level**, each project defines Project Development Objectives (PDOs, i.e., outcomes) and Intermediate Results Indicators (IRIs, i.e., outputs). Progress is tracked at three points: ex-ante (appraisal), mid-term, and completion. At the **corporate level**, AIIB tracks three elements: portfolio volume, portfolio alignment with strategic targets, and portfolio performance.

Project-Level: PDO Indicators (outcomes)

Sector	Key PDO Indicators
Water	People with safely managed water access (# disaggregated by gender); non-revenue water reduction (%)
Sanitation	People with safely managed sanitation (# disaggregated by gender)
Urban mobility	Public transport journey time reduction; daily passengers (# disaggregated by gender); on-time performance (%)
Energy	Annual renewable generation (GWh); GHG reduced (tCO2e/year)
Digital	Broadband penetration rate increase (%); people with new high-speed access (#)
Finance	Private capital mobilized ($M); SMEs receiving financing (#)
Manufacturing	Capacity installed (MW); sales volume; export volume; employee diversity (%)

Project-Level: Intermediate Results Indicators (outputs)

Category	Key IRI Indicators
Physical progress	Km of roads built/rehabilitated; substations constructed (#); water pipes laid (km)
Institutional	Regulatory reforms completed (#); O&M systems established; staff trained (#)
Social / Gender	Female beneficiaries (#); gender-responsive designs implemented; grievance redressal rate (%)
Environmental	Land restored (ha); environmental mitigation plans completed

Corporate-Level Targets

Element	Indicator / Target
Portfolio volume	Total resources mobilized; private financing catalyzed ($M)
Portfolio alignment — Climate	≥50% climate finance share by 2025
Portfolio alignment — Connectivity	25–30% cross-border connectivity by 2030
Portfolio alignment — Private sector	50% private sector operations by 2030
Portfolio performance	Annual disbursement ratio; projects without severe issues (%); completion success rate

Evaluation Framework (LEF — Learning and Evaluation Framework)

AIIB evaluates completed projects against 7 criteria:

Criterion	Core question	What is assessed

Criterion	Core question	What is assessed
Relevance	Right project?	Alignment with AIIB and client priorities; design appropriateness
Effectiveness	Achieving objectives?	Intended/unintended results; distribution of benefits
Efficiency	Good use of resources?	Financial rate of return (FRR); EIRR; cost overruns; delays
Sustainability	Benefits lasting?	Financial, economic, social, environmental sustainability
Impact	Broader effects?	Higher-level development change beyond project scope
AIIB Work Quality	AIIB's own performance?	Due diligence quality; supervision quality; lessons integration

Criteria are not mechanically aggregated — evaluators apply context-dependent weighting.

Environmental & Social Standards (from ESF and Bond Framework)

Theme	Key Indicators
GHG	tCO2e reduced per year; renewable capacity added (MW)
Air quality	NOx, SO2 (t/year); PM2.5 (μg/m³)
Land	Hectares protected or restored
Water / Sanitation	Households with access (#)
Digital	People with internet access or digital services (#)
Climate resilience	Beneficiaries with improved climate resilience (#)

Source documents: *AIIB Results Architecture* (final public version); *Corporate Strategy — Financing Infrastructure for Tomorrow*; *LEF Guide to Evaluation Criteria*; *Environmental and Social Framework* (June 2024); *Sustainable Development Bond Framework*; *SD Bonds Impact Report 2024*.

6. IDB — 2024–2030 Impact Framework

Framework: Development Effectiveness Overview (DEO); annual ex-post/ex-ante reporting **Three pillars:** Social Progress | Economic Growth | Climate Action

Social Indicators

Indicator	Metric
Education	Students benefiting from improved school conditions (#)
Health	Individuals with access to improved health services (#)
Social protection	Households receiving social transfers (#)
Gender	% of projects with specific gender outcomes; gender gap reduction

Economic Indicators

Indicator	Metric
Innovation	SMEs adopting new technologies/processes (#)
Infrastructure	Km of paved roads built/rehabilitated; GWh of energy generated
Finance	Loans to SMEs ($M); private capital mobilized ($M)
Integration	Cross-border trade efficiency improvement (%)

Climate and Environmental Indicators

Indicator	Metric
GHG reduction	Annual tCO2e avoided or reduced
Renewable energy	Capacity installed (MW)
Adaptation	People with increased climate resilience (#)
Biodiversity	Land/marine ecosystems protected (ha)

Institutional Capacity Indicators

Indicator	Metric
Transparency	Public entities with improved financial management systems (#)
Regulation	New or improved regulatory frameworks adopted (#)

Indicator	Metric
Fiduciary	Procurement time/cost reduction (%)

Source documents: *IDB 2024–2030 Impact Framework*; *Development Effectiveness Overview (DEO)* (annual, public).

7. IsDB — Realigned Strategy 2023–2025

Framework: 10-Year Strategy + Realigned Strategy 2023–2025; results mapped to SDGs and Maqasid al-Shari'ah **Unique layer:** Islamic ethical objectives integrated alongside standard development indicators

Social Development Indicators

Indicator	Metric
Poverty	Households with improved livelihoods (#)
Health	Beneficiaries with access to improved health services (#)
Education	Students enrolled in new/rehabilitated schools (#)
Inclusion	Female beneficiaries (#); jobs created for youth (#)

Infrastructure & Productivity Indicators

Indicator	Metric
Energy	New electricity capacity (MW); people with new connections (#)
Transport	Km of all-weather roads built or improved
Agribusiness	Smallholder farmers with improved market access (#)
SME growth	Loans to micro, small, and medium enterprises ($M)

Climate Action & Resilience Indicators

Indicator	Metric
Mitigation	Annual GHG avoided or reduced (tCO2e)
Adaptation	People with increased resilience to climate/disaster risk (#)
Water	Households with improved water and sanitation access (#)
Green finance	Volume of green financing mobilized ($M)

Maqasid al-Shari'ah Indicators — Islamic Ethical Layer

These five objectives map Islamic principles onto development outcomes, giving IsDB a unique dual-reporting structure:

Islamic Objective	Meaning	Development Counterpart
Hifz al-Nafs	Protection of Life	Health and safety outcomes
Hifz al-Mal	Protection of Wealth	Economic empowerment; financial inclusion
Hifz al-Nasl	Protection of Progeny	Education; youth development
Hifz al-'Aql	Protection of Intellect	Knowledge, research, innovation
Hifz al-Din	Protection of Faith/Values	Social cohesion; ethical governance

Source documents: *IsDB 10-Year Strategy*; *Realigned Strategy 2023–2025*.

---

8. NDB — General Strategy 2022–2026

Framework: General Strategy 2022–2026 + NDB Evaluation Manual **Focus:** Sustainable infrastructure exclusively; BRICS + invited emerging economies; SDG-aligned

Energy Indicators

Indicator	Metric
Clean energy	Annual renewable energy generation (GWh); capacity added (MW)
Efficiency	Annual energy savings (GWh/year); transmission loss reduction (%)
GHG reduction	Annual tCO2e avoided or reduced

Transport Infrastructure Indicators

Indicator	Metric
Connectivity	Km of new/rehabilitated roads, railway tracks, or subway lines
Freight / Passenger	Annual passenger trips (#); annual freight volume (t/year)
Efficiency	Travel time reduction (%); logistics cost reduction (%)

Water and Social Infrastructure Indicators

Indicator	Metric
Water supply	People with new/improved safe water access (#); daily supply (m^3)
Sanitation	People with improved sanitation (#); wastewater treated (m^3/day)
Social	Students/patients benefiting from improved infrastructure (#)

Digital Infrastructure Indicators

Indicator	Metric
Connectivity	People with new/improved broadband access (#)
Digital services	Businesses adopting digital platforms (#)
Efficiency	Internet data throughput increase (Gbps)

Private Sector Development Indicators

Indicator	Metric
Private capital mobilization (PCM)	Private capital mobilized directly/indirectly ($M)
Business growth	Private sector firms supported (#); jobs created (#)

Source documents: *NDB General Strategy 2022–2026*; *NDB Evaluation Manual*.

9. AfDB — ADOA (Additionality and Development Outcomes Assessment) 3.0

Framework: ADOA 3.0 — applies to all Non-Sovereign Operations (NSO) of the African Development Bank **Scoring scale:** 4-point qualitative scale (Excellent / Good / Marginal / Poor) mapped to a continuous 1–10 score **Two main dimensions:** Development Outcomes + Additionality (DFI value-add)

How the scoring works

Each project is rated across two top-level dimensions. **Development Outcomes** measures the actual benefits generated for people, markets, and the environment. **Additionality** measures what the AfDB contributes that would not have happened without its involvement (financial and non-financial). Both dimensions are likelihood-adjusted for country and project context risk. A project in a highly constrained environment (rated on a 3-point context scale) is judged more favourably than the same project in an easy environment.

Context scale: Highly Constrained → Constrained → Unconstrained **Outcome categories rated:** 6–7 categories depending on sector, each scored Excellent / Good / Marginal / Poor

Development Outcomes Dimension

Outcome Category	Key Indicators
Access to financial services	New accounts opened (#); loans to MSMEs ($M/unit); insurance policies written (#)
Access to goods & services	Housing units financed (#); transport connections improved; utilities connected (#)
Private sector development	Firms supported (#); market entrants (#); investment catalyzed ($M); jobs created (#)
Household outcomes	Beneficiary income improvement (%); poverty reduction contribution; livelihood diversification
Resilience & adaptation	People with improved climate resilience (#); assets protected; adaptation investment ($M)
Environment & climate	GHG avoided/reduced (tCO2e/year); renewable capacity added (MW); land restored (ha)
Regional integration	Cross-border infrastructure projects (#); trade facilitation impact; regional connectivity improvement

Additionality Dimension

Additionality Type	What it measures
Financial additionality	Whether project financing terms (tenor, risk, pricing) fill a genuine market gap; mobilization of co-investors ($M)
Non-financial additionality	Technical assistance provided; knowledge transfer; governance/standards improvements; reputational signalling
Political risk mitigation	AfDB participation reducing sovereign/regulatory risk perception for private investors

Sector-Specific Frameworks

ADOA 3.0 includes dedicated indicator catalogues for 7 sectors:

Sector	Representative Sector-Specific Indicators
Financial Services	Portfolio-at-risk ratio; deposit mobilization; financial inclusion index change
Energy	Levelized cost of energy (LCOE); SAIDI/SAIFI reliability; electrification rate change (%)
Transport	Vehicle operating cost reduction (%); freight volume (t/year); road safety fatalities per 100km
Water	Non-revenue water reduction (%); water quality compliance rate (%); coverage expansion (km of pipes)
Agriculture	Smallholder yield improvement (t/ha); post-harvest losses reduction (%); market price volatility reduction
Manufacturing	Capacity utilization (%); export volume growth; resource efficiency improvement
Digital Infrastructure	Broadband penetration increase (%); digital services adoption (#); latency reduction (ms)

Unique features:

- Continuous 1–10 scoring replaces older 6-point discrete scale, enabling more nuanced differentiation
- Explicit context-risk adjustment: identical outcomes in a "Highly Constrained" country earn a higher score
- Integrated theory-of-change assessment — evaluators must trace the causal pathway from project to outcome
- Regional integration is a standalone outcome category (important for pan-African mandate)
- ADOA-RO 2.0 sub-framework for Regional Operations applies additional cross-border integration criteria

Source documents: *ADOA 3.0 General Framework* (AfDB); *ADOA Annual Report 2024* (portfolio implementation data).

Cross-Framework Indicator Comparison

> This table shows how each framework measures the same development themes. Cells show the specific metric or approach used.

Theme	EBRD/ATQ	IFC/AIMM	FAST-Infra	ADB/DMF	AIIB/RMF	IDB	IsDB	NDB	AfDB/ADOA
